

SETTING UP THE GAME!

GLOW BATTLE

1. CHOOSE YOUR PLAYING FIELD

Whether it's a giant campground or a tiny backyard, make sure it's a safe place to run. Getting hit by a Weapon of Light is fun. Falling on your face is not so much fun!

2. MARK YOUR REGENERATION STATION

Pick a spot for your team's Regen Station. Mark it by forming a square on the ground using your four Station Lights. This is where you'll start and where you'll go after you're hit.

3. IGNITE YOUR LIGHTS

Put your bracelet on and set it to "solid" (non-flashing) mode. Grip your Weapon of Light by its handle and turn it on. Psssshew, shlink, wuuump – whichever sound you imagine...

NOW YOU'RE READY!

HOW TO PLAY!

Pick your team:

green

blue

Gather inside your team's Regen Station...

then begin!

Smack your opponents but...

don't get hit!

If you do, go back to your Regen Station and change your wristband to **flashing mode.**

If you get hit a second time...

you're out!

Knock all your opponents out...

and you win!

THE RULES

Because actually killing people is a lot less fun than you'd think, we have some important practices for you to follow. They'll help make sure everyone has fun – even as you thwack the living daylight out of each other.

USE ADULT SUPERVISION

Believe it or not, adults can be helpful. They will make sure the fun level stays cranked to 11...in a safe way.

NEVER PLAY IN COMPLETE DARKNESS

It's fun to hit your friends, not crash into each other. So play with some light and never turn the game lights off until you're done.

NO HEAD HITS!!!

Again, with capital letters and explanation points: NO HEAD HITS!!! Even adults amped up on energy drinks shall be kicked out of the game for head strikes.

ONLY SOME HITS COUNT

Hits to the head, forearms, or hands do not count – so being reckless doesn't pay off.

KEEP THE LIGHTS ON

Being sneaky is fun, cheating is not. Always keep your Regen Lights and Weapons of Light lit. If one turns off accidentally, turn it back on as soon as possible.

ONLY HIT PLAYERS IN THE GAME

Do we really need to explain this one?

REGEN STATION REGULATIONS

All players must begin inside their Regen Stations. Get hit and you must return to your Regen Station and change your bracelet from solid to flashing. You're safe for the next five seconds – but after that: one more hit and you're out!
